

Malte Commercial Tank

When you need an efficient and commercially attractive unit for fuel supply, we have the right solution. Designed and approved for Class III products like diesel, HVO, RME, or similar fuels. This versatile tank can also handle Class 1 non-vehicle products that don't require vapor return stage 1. It accommodates up to two products and comes in volumes ranging from 20.5 to 60.5 m³, with one or two compartments. Malte Commercial is suitable for industries, construction sites, and locations requiring no more than two products.

As a buyer, you can choose between large and small platforms based on your needs and location. Malte Commercial can be ordered pre-assembled or flat-packed to optimize transportation costs. Malte Commercial is built to adhere to local regulations in each country, with outer wall reinforcements acting as secondary containment. All visible surfaces feature C4-quality coating, while other surfaces are coated with C3-quality

materials. Custom coating options are available upon request. Equipped with an electrical cabinet containing an internal electrical central and space for level measurement, alarms, modems, and more. Dispensers and payment terminals from common manufacturers can be installed.

Safety assured and Eco-friendly

Meets the requirements for a 12-year inspection interval according to Scandinavian regulations. Comes with all necessary safety features. A sustainable and fully enclosed tank, featuring a 150-litre spill tray under the filling location, which is also lockable.

Movable

Cost-effective

Industry / B2B

Smaller footprint compared to a round tank

Can also serve as battery tanks

Custom branding

Standard features
