

Malte Retail

Introducing Malte Retail, your solution for a high-efficiency and commercially attractive fuel supply unit designed for the retail market.

Whether you need diesel, petrol, ethanol, methanol, HVO, RME, or similar products, Malte Retail has you covered. Our system can handle up to five different products and comes in volumes ranging from 18.4 to 80 m³, with customizable compartments from one to five.

Malte Retail is suitable for various applications, including retail, commercial, industrial, and easily accessible locations. As a buyer, you can select from small, medium, and large platforms to meet your specific needs and location. Malte Retail offers a standard sinus facade in various colors or the option of a cassette facade with an unlimited choice of colors. Our units are constructed to meet local regulations in each country, ensuring safety and adherence to standards. Rein-

forced outer walls act as secondary containment and provide weather protection for the entire unit. All visible surfaces are coated in C4 quality, with C3 quality used elsewhere. Custom coating options are available upon request.

The unit is equipped with technical room with an internal electrical central and space for level measurement, alarms, modems, and more. Malte Retail can be fitted with dispensers and payment terminals from common manufacturers in the market. The unit meets the requirements for a 12-year inspection interval according to Scandinavian regulations. Malte Retail is delivered with all safety requirements, a fully enclosed tank, a lockable 150-liter spill tray under the filling location, and an electrical anti-siphon function.

Movable

Above ground

Reliable

Adaptable

Custom branding

- Cost-effective
